Session 4 **2:15p -3:15p**	Lockdown Browser and Safe Assign Seung Gutsch	Bb Grade Center Grace Zhou	Open Lab Ahmed Lachheb

Teaching Excellence and Integrated Technologies

Concurrent Session Descriptions

Intro to Bb: If you're new to the Blackboard Learning Management System (LMS) this workshop is for you. (Seriously, you need to attend this one.)

Bb Communication Tools: Sometimes you want your students to reflect on their ideas before they share them. Online discussions, blogs, wikis, and journals were built for this.

Bb Exams and Assignment Tools: Even if you're teaching face-to-face you should consider using some online assessments. This workshop will focus on Bb quizzes and online submission of assignments.

Bb Collaborate: Sometimes you want to talk with your students in real-time, even if you're not all in the same place. Learn the how and why of synchronous communication online.

Open Educational Resources: There are a wide variety of instructional resources freely available online. Come and learn how to find them and use them in your course.

Using Bb Rubrics: You can easily create simple (or complicated) rubrics within Bb and then use them to grade assignments and assign scores right within the page. Makes grading papers almost fun. (Almost…)

Voice Thread: This nifty software package not only allows you to post content online with voice annotations but enables students to leave their voice and text comments, as well. Cool stuff.

Bb Grade Center: Tired of those calls and e-mails asking if grades are available? Keep your gradebook on Bb and not only will your students love you, their scores will be safe and secure.

Lockdown Browser and SafeAssign: Two tools that help with assessment security – a browser made just for taking tests and a plagiarism-detection system.

Open Q and A Session: Have questions about Blackboard? About Instructional Technology at FHSU? We'll either have the answers or get the answers. (Sorry, no questions about the meaning of life. We don't know either.)
