FORT HAYS STATE UNIVERSITY

Forward thinking. World ready.

Dear Prospective Student:

We are delighted to learn of your interest in the Undergraduate Nursing Study Program at Fort Hays State University. The study of nursing prepares you for an exciting and rewarding career. Let me tell you about our offerings.

We have an exceptionally good Baccalaureate Nursing Program at FHSU. Our program is nationally accredited by the Committee on Collegiate Nursing Education. We are also state approved by the Kansas State Board of Nursing. The national accreditation and state approval assures you of a quality program and is necessary to qualify you for sitting for the state board licensure exam required of all registered nurses.

Enclosed are some materials you will want to examine regarding our nursing program. The Tentative Curriculum Plan gives you a suggested curriculum distribution of the classes you are required to take, and the semester in which you could take those classes. Your advisor will help you to fit your needs into the semester schedules. The General Education sheet gives you the list of classes you may use for your general and upper electives.

After reviewing these materials if you have any questions please contact jdechant@fhsu.edu or call for further information. If you wish to be considered for admission into the Nursing Program, **please request an application by calling 785-628-4256.** We will send the application and three reference forms to you promptly.

If you want to transfer credits from another institution, please request that an official transcript be sent to Fort Hays State University's Registrar's Office, prior to making an appointment with an advisor. This will enable your advisor to make informed decisions concerning your schedule.

Sincerely,

Department of Nursing
Fort Hays State University
