

ACADEMIC ADVISING

Fort Hays State University continues in its belief that academic advising has a significant impact on student success and persistence. We are working continuously to improve upon our advising plan and working to review, update, and revise some of our processes to help students formulate a sound education and career plan. Our advising goals and the Regents' Academic Advising Baseline are driving forces in our efforts for continuous quality improvement along with our AQIP process for NCA Accreditation.

We went from the paper version of the Academic Advising Evaluation to an online version in the spring semester of 2003. This created a decrease in the number of respondents. Plans were developed to address this concern with students, faculty and staff. We believe that those plans are working. This year our responses increased by 75% from 822 to 1439.

REGENTS' SECTION 1.

Goal Setting

Goal setting is a crucial element for all FHSU students. We identify the necessities of this element as University Goals 1 and 2. We help students clarify their individual values, career goals and challenges of the 21st century, as well as develop suitable educational plans and programs of study.

- Our advisors meet with each advisee in a one-on-one situation to help the advisees identify their values, career goals and challenges they may face in the 21st century. We do this by utilizing ACT Report information, career counseling, career services and knowledge of the faculty advisors related to their field of expertise.
- Our student evaluation of academic advising results show us that of the 1428 students who responded to item 6: "My advisor discussed career opportunities in my field of study," 721 strongly agreed or agreed that this was happening during their advising experience. In regard to item 8: "I have discussed my educational goals with my advisor," 979 students strongly agreed or agreed that this too was occurring.
- The Academic Advising and Career Exploration Center website added a new component for students who pursue degrees at FHSU. This site provides current information reflective of today's market <http://www.fhsu.edu/aace/MAJORS/index.shtml> is What can I do with a major in....

Information

Information is knowledge and at FHSU we believe in complete and total access. Our University Goals 4 and 7 help students to review and evaluate their progress towards established goals and completion of requirements within individual programs of study, as well as helping students to clarify and improve his/her knowledge of career options and potential for career change.

- To meet these goals, FHSU current and prospective students receive general education planning, course selection planning and a degree plan. This planning is done with the advisor to ensure that the student will be able to achieve his/her educational/career goals.

- Students who are seeking a degree also receive an official degree summary provided by a degree analyst in the Office of the Registrar. The advisor and advisee review the degree summary on a semester basis to ensure that curriculum needs are identified and met.
- Web and paper course schedules are available for each student, which allows them to review their plans and curriculum needs before registration appointments are held with their advisor.
- Career options are discussed with the advisor in the department and services are also available at the Academic Advising and Career Exploration Center and Career Services. Students who want to explore multiple options are referred to Career Exploration, the Career Planning and Development class and other academic departments where they have interests.
- Information is made available to students through the University Catalog, websites (i.e. www.fhsu.edu/aace) and in department offices regarding curriculum and many other areas too numerous to include.
- Our campus-wide student evaluation of advising addresses the aspect of providing information. Responses to item 3: "My advisor provides accurate information concerning course selection" and item 4: "My advisor provides information concerning graduation requirements," both supported the total access approach. These items received strongly agree or agree responses 1101 and 979 respectively. 129 (9%) students marked neutral on item 3 and 151 (11%) did the same on item 4.

Transitions

FHSU believes that we should provide information regarding changes in major, advisor, and schools. Our goal is to ensure that each student is provided the opportunity to fulfill his or her educational and career goals.

- Information is available to students through a variety of avenues: advisor, Office of Academic Advising, Office of the Registrar, *Student Academic Planner*, *University Catalog*, and the Fort Hays State University website.
- A transfer equivalency website has been created to ease the transition from other institutions. The website (<http://webcat.fhsu.edu/equiv>) provides information by degree program requirements. We also have a course equivalency website for Kansas Community Colleges <http://www.fhsu.edu/registrar/Transferbase.shtml>.
- FHSU students had 7,761 adds and drops processed during Academic Year 2004-2005. These figures reflect that FHSU students are aware of how to make schedule changes through add/drop/withdrawal.
- The assessment of transitions was provided in items 5, 10, and 11 of the student evaluation of advising. These items are: 5: "My advisor provides information regarding the add/drop process," 10: "I understand the process to change my major," and 11: "I understand the process to change my advisor." Our assessment tells us that in relation to transitioning we have some work to do. Students selected strongly agree and agree on those three items 68%, 48%, 43% of the time, respectively. Two factors to point out here are that 8%, 12%, and 14% of the respondents said that they are neutral and 15%, 17% and 15% state that this does

not apply to them. We still must continue to provide the information to students when or if the need would arise for them to make changes.

- We had 5,792 major changes during the 2004-2005 Academic Year. Students at FHSU are well aware of the process to change their major.

Accessibility

Accessibility is always an issue to be aware of when you have a faculty based advising system like FHSU. Establishing and maintaining reasonable hours of availability for students is dealt with on a semester by semester case. Due to the division of teaching, research and service of faculty members differing by semester, university policy requires that each advisor post their office hours for view by constituents. Students should be able to set up appointments within the system for an adequate amount of time to make curricular selections and career choices.

- During the 2004-2005 Academic Year, 17,749 students were registered by advisors.
- Advisors are required to post office hours for student information.
- Appointments can be made with advisors in person, by phone, fax, or e-mail and through department offices.
- Office hours are extended to accommodate students when mid-term grades are released and during early registration times.
- "Adequate time is available to meet my advising needs," is Item 9 on the assessment. Students responding selected strongly agree or agree 73% of the time.

Referral to Campus Resources

Referral of students to appropriate campus resources is vital for student success and retention. FHSU University Goal 6 is to encourage students to utilize University support services and related resources as needed (Kelly Center, Career Services, etc.).

- The assessment process at FHSU provides information regarding referral sources that student's access. The numbers provided here are reflections of services accessed during the 2004-2005 Academic Year.
- The student evaluation of advising looks at this issue in item 7: "My advisor makes referrals to appropriate campus resources/services." Students responded 43% of the time that they strongly agree or agree while 13% responded neutral with an additional 17% stating that this items does not apply to them.

The increase in enrollment has brought about discussion of services needed to successfully enhance student educational experiences. The following table shows the usage of referral programs during fiscal years 2000-2005. Additionally, the table shows the percent increase or decrease when fiscal year 2005 is compared to the previous fiscal year.

Table 1 Referral Resources and Units of Service Provided

Other Test Administrations

HIGH SCHOOL COMPUTER TECHNOLOGY PROFICIENCY EXAMINATION	FY 2005	FY 2004
Number of Different Schools That Tested Students (NOTE: This number does not include inquiries by schools that have not yet requested test administrations, nor those that were sent test administrations but returned them unused. Schools that requested test administrations on more than one occasion are counted only once.)	16	7
Number of Requested Test Administrations (NOTE: This number includes all requests for test material packets. A school that requested multiple test packets at a single time is counted only once. However, a school that requested test material packets at different times during the year is counted for each request.)	41	23
TOTAL NUMBER OF EXAMINEES TESTED (SCORE REPORTS PROCESSED)	121	69

REGENTS' SECTION 2.

Each Academic Advising System shall provide information to students to inform them of their responsibilities in the academic advising process.

- The *Student Academic Planner* was developed to inform students of a variety of issues (advising expectations, academic success, general education requirements, transfer and articulation, procedures, Internet access, frequently asked questions and many more). The planner serves as a resource in addition to the faculty and staff who are available to help meet the needs of both current and prospective students. The planner has also been placed online at: <http://www.fhsu.edu/aace/academicplanner.shtml>.
- The Academic Advising website (<http://www.fhsu.edu/aace/>) provides information regarding the responsibilities of both the advisor and the advisee.

REGENTS' SECTION 3.

Each Academic Advising System shall be responsible for the necessary training of Academic Advisors to assist them in meeting the requirements of this Baseline.

- FHSU started its formal development program in the fall of 1997. Formal plans have been made to tape each development workshop and stream them online at: <http://www.fhsu.edu/aace/TIGERWORKSHOPS.shtml>.
- Advisor development program addresses a large range of topics including, but not limited to: referral sources (career counseling, career placement, academic success, drug/alcohol counseling, student health, personal counseling, financial assistance), policies and procedures related to advising, advising special populations (international students, athletes, disabled students), using the ACT Profile, general education, and transfer and articulation.
- The Academic Advising and Career Exploration Center publishes online (<http://www.fhsu.edu/aace/tigerexchange/>) the *Tiger Exchange* which is a newsletter for advisors that provides current information on advising, provides answers to frequently asked questions, and exchanges ideas about advising. Publishing online allows for easy access for everyone.

- The Academic Advising website provides a site solely for faculty and staff (<http://www.fhsu.edu/aace/faculty.shtml>). This site provides information related to advising and related resources.

REGENTS' SECTION 4.

Each Academic Advising System shall have a mechanism to assess Academic Advising at the Department level, considering the above Baseline, on a yearly basis and shall report the results of said assessment as part of Program Review to the Board of Regents.

- Assessment information has been included throughout this report regarding the campus wide assessment. The assessment information allows for the development of programs specific to the needs of our institution.
- Each of the four academic college deans receives assessment information related to their college's academic departments and their college as a whole.
- Department level assessment allows the university to identify areas for improvement and issues that have been addressed.

Fort Hays State University is committed to academic advising. During the next year, we will be participating in the Year of the Department: A Call to Engagement. This is an opportunity for campus-wide involvement in assessing what we do and determining ways that processes can be improved.
