## **1. Analytic Parameters**

These analyses are predicated on the following parameters, unless otherwise indicated:

**Dependent measures:** NSSE indexes and questions  
**Independent variable:** Enrollment type (On-Campus or Virtual College)  
**Sample\Population:** Students with class rank of senior

## **2. Results**

The sampling (n = 710) is drawn from the larger senior population (N = 1670) submitted for analysis. The sample included 422 female students and 288 male students. Of the seniors, 654 were US residents and 23 were international students. Additionally, 233 seniors began their studies at FHSU, while 445 began their college education elsewhere. Regarding enrollment, 252 are characterized as less than full-time and 458 are considered full-time. The racial composition of this sample is noted below.

<b>Native American</b>	<b>Asian</b>	<b>African American</b>	<b>White</b>	<b>Hispanic</b>	<b>Other/Not Identified</b>
0	21	26	604	34	25

The senior sample is comprised of the following student age strata:

<b>19 or younger</b>	<b>20 to 23</b>	<b>24 to 29</b>	<b>30 to 39</b>	<b>40 to 55</b>	<b>Over 55</b>
0	325	130	114	102	7

**Analysis 2.1: Level of Academic Challenge.** This analysis explored the difference between senior students taking only distance education classes and those taking on-campus classes or a mix on their perception of academic challenge. The findings confirm that **students taking classes at a distance feel about the same level of academic challenge as on-campus students** (F = 1.06, p = ns).
