

# Blackboard Learn (9.0) Assignment and Assessment

## Viewing the Results of a Survey

Step 1: To view the results of an online survey, click the downward-arrow icon in the survey column's title cell in the **Grade Center** and then click **"Attempts Statistics"**.

This will show the results of all the students who have submitted it. You can also download the results in the form of a spreadsheet by clicking on "Download Results". Since surveys are anonymous, individual student responses cannot be viewed. However, when a student completes a survey, a checkmark will appear in the Grade Center.
