If yes, under what conditions:

Course Description As It Would Appear In The Catalog: This course will teach recognition, evaluation, and management techniques to athletic training students focusing on musculoskeletal injuries and conditions of the pelvis, hip, thigh, head, face, temporomandibular joint, torso, and spine. This includes anatomical knowledge, common signs and symptoms of musculoskeletal injuries and conditions, evaluation techniques and special tests, correct use of medical terminology, and documentation skills.

What Are The General Objectives Of The Course?: Students will be able to identify different musculoskeletal conditions and injuries (pelvis, hip, thigh, head, face, temporomandibular joint, torso, and spine), perform a musculoskeletal evaluation, determine a diagnosis, and provide treatment for diagnosed injury/condition. The course objectives listed in the syllabus are based
