

What is the Student Government Association?

We, the students of FHSU, organize ourselves as the Student Government Association for the purpose of serving, protecting and promoting the interests and rights of the students of this institution.

We strive to preserve the SGA as an effective means of representing students; to provide a constructive line of communication between students, faculty/staff and administration; to foster student involvement in all campus activities; to enhance educational, social and cultural experiences of all students; and most importantly, to provide an environment conducive to the education of all FHSU students.

The SGA is a representational form of government with Student Senate seats available by academic major. It has a long history of being the central student organization at FHSU. Its goal is to work as an advocacy group on behalf of students' concerns. The SGA works with every student organization on campus and serves as the voice of FHSU students to the administration, faculty/staff and the Kansas Board of Regents. In addition, the SGA oversees the distribution of student fee money to all student organizations and student services.

“Serving the Students”

- Reaching Out to Students

Civic and political apathy has become a serious problem on many college campuses in America, and the SGA is determined to see that this does not happen at FHSU. It is our belief that apathetic individuals cannot become engaged in their surroundings until they are first engaged by empathetic individuals. Therefore, this year the SGA will be making every effort to actively engage the students. Hopefully, this excited, energetic group of student leaders will be able to pass that excitement onto the student body. Not only do we hope this will increase civic and political activity on campus, but we also believe this will allow us to better determine the student attitude toward campus happenings. The SGA understands its duty to deliver the student's opinions to the campus administration and our activity this year will allow your message to be stronger than ever before.

- Student Involvement

Being involved on campus is vital for student success throughout the student life experience. By

increasing participation at athletic events, so athletes know we support them in their competitions. Improving the traffic in the Memorial Union to its services can assist the daily life of a student here at FHSU. Promoting student organization's to contest each other to create a fun, competitive atmosphere.

- Community Outreach

We will work with the city of Hays and the business community to better integrate FHSU students into the community. The SGA will provide networking opportunities for future business leaders and community leaders.

- Availability of SGA Executive Staff and Senate

In order to make these issues a success, the SGA must be dedicated and available to serve the student body of FHSU. The SGA has selected a great executive staff, appointed committee chairs and maintains devoted senators who will hold office hours and be available to assist students each and every day. Our office is always open for your concerns and complaints to the Executive staff and Senators. We are here to serve, protect and defend the rights and responsibilities of the student body of FHSU.
