The Department of Physics at Fort Hays State University is pleased to announce the NASA Scholar scholarship program. This scholarship is made possible through the Kansas Space Grant Consortium* and is intended to promote the study of physics and engineering by outstanding undergraduates.

The NASA Scholar grant is in the amount of $1000 per year in addition to any other scholarships received at Fort Hays State University. This scholarship will be renewable for up to four years for students who choose to study physics, pre-engineering, or physical science at FHSU. A NASA Scholar will be required to maintain a cumulative grade point average of at least 3.0 on a four-point scale. NASA Scholars will also be required to enroll in at least one physics course which counts toward their major each semester after their freshman year, and they will be expected to engage in undergraduate research during their junior and senior years, if not earlier.

Students with outstanding academic records are encouraged to apply for this scholarship. The application consists of:

- A letter describing the student's future career plans and academic goals within the fields of physics or engineering.

This is a competitive process, as the number of scholarships available is limited. Please send your application letter to:

Department of Physics  
NASA Scholar Program  
Fort Hays State University  
600 Park Street  
Hays, KS 67601-4099
